- **We have experience mainly with plastics, castings, stampings, rubber, glass, PCB, treatment of surfaces and installations.**
- **Client-specific reports are available for all projects. We also create a written and / or photographic work instructions.**
- **All work instructions must be and are approved before starting work.**
- **We verify specific product and material - results are systematically recorded**
- **We create and manage a clear records of qty of sorted parts, qty of NOK parts, tact time of each operation, etc for every project,**
- **We run a website for on-line result communication for ongoing sorting / rework.**
- **We regularly train our employees , as well as strong follow up of operators, tact time performance, compliance with the work instruction, etc..**

Sorting and rework operation

- **Sorting**

We sort and classify components that do not meet the requirements of customers by visual inspection, electrical tests, dimensional checks.

- **Rework**

We are able to rework non-conform components to meet customer requirements for quality (grinding, sawing, cutting, measuring by means of sliding gauge, gauges ...). All process with a minimum notice.

- **Quality control**

We are sorting or reworking components on base of claims either from Valeo or from Valeo customers. Within a Valeo plant we are ready to provide our service within a minutes as we permanently have our employees located directly in the production plant

We are able to perform as well a preventive control based on your and by Valeo approved instructions

- **Securization**

We can sort 100% of the components prior to release to the customer's manufacturing process. Offered reliability and capability of our process is for us very important to avoid using non-conforming products.

Control services

- **Preassembly, Production**

We can manage subassemblies and assembled units according to customer requirements in order to secure quickly, professionally and cost-effective accurate service.

- **Packaging, Labelling**

We can inspect - components, packaging, repackaging parts, marking and registration of components for identification - according to customer requirements.

- **Incoming inspection**

We can perform Incoming Inspection control of components - random dimensional and visual inspection comparing the first sample and actual delivery, packaging inspection etc..

- **Maintenance of returnable packaging**

Cleaning, washing, storing, distributing, sticking labels refundable and non-returnable boxes and packaging.

- **Logistic**

We can deliver your goods to the desired destination.

- **Re – billing / Charge back**

We can arrange the rebilling of the costs to your suppliers.

- **Reporting**

We can collect and store data according to the needs of individual projects. Customized reporting is included in standard costs, unless a special preparation for the development of non-standard contracts. Reports and invoices can be provided via e-mail, fax or mail.

Support system of managementu

- **Partnership**

We work with permanent and long-term customers, so that win-win environment, and the percentage of satisfied customers is approaching to equal to number 100

- **Communication**

Good communication ensures success, instructions are fixed, the changes can be made prior to agreement, instructions and deadlines are met. E-mail, fax, phone and Internet sites used to communicate and meet the needs of our customers

- **Responsiveness**

On-line supplies operate 24 hours a day, 7 days a week. We respond to emergencies and we are ready to give our customers what they need. We have fixed the response time of our service requirements for two hours, unless the regulation otherwise provides our customers

Support system of managementu

- **Awareness of cost**

We are aware that costs are a major factor in attracting and maintaining our customers. That is why we are continuously looking for ways to improve the control processes and at the same time to reduce overall project costs, not only for ourselves but also for our customers

- **Project structure**

We work together with our customers when defining specific project requirements. The detailed cooperation ensures that each project is clearly defined and understood even before the commencement of work. We are able to prepare guidance and work instructions (in the case of customer wish or not providing).

The details of each project are confirmed in writing with the customer to avoid errors and misunderstandings.

- **Quality support**

We offer a quality and technical support, which includes creation of work instructions, corrective actions, - root cause analyses, work flows, evaluations and statistical analyses. We are using such a methods, which allow us to find the most problematic areas and then to take corrective action on rder to increase a profit which finally leads to savings even for our customers

ISO 9001:2008

- **ASPO is certified by EN ISO 9001:2008. We provide services that meet or exceed the expectations of our customers in terms of time, cost and quality. We measure parameters of our performance and we are motivated to constantly improve our offer services for the benefit of our customers.**
- **We work closely with the company VALEO Autoklimatizace since 2005, as a partner to ensure detection of poor quality and partner for sorting / rework.**
- **Experience in the automotive industry and their direct knowledge of quality systems and manufacturing problems gives us invaluable experience.**
- **Experience in automotive, quality systems, production problems in combination with sorting, quality control, repair parts allows us to offer comprehensive services for our clients and also invaluable experience for us.**
- **Commendation:**
 - Valeo Autoklimatizace, Eberspacher, InterControl,**
 - Procter and Gamble - Rakona, MPD plus, Arvato services...**
